REMARKS

25X1

1. On 5 June 1953, the Flak Kaserne and the Infanterie Kaserne were occupied only by small rear details. No activities other than physical training and guard duty were observed. Soviet officers stated that the units from the installations transferred to the Altengrabow troop training grounds and that they would return to their installations by mid-September.

2. Prior to 5 June, two different types of heavy two-load howitzers in the Generalfeldzeugmeister Kaserne, Brandenburg, which repeatedly left the installation toward Bohnenland during the period under review. The unit usually stayed at the training area for 2 or 3 days.

At about 10 p.m., trucks almost daily were seen leaving the installation for driving school practices, returning between 4 a.m. and 5 a.m. on the following day.

3. Prior to 2 June, the Generalfeldzeugmeister Kaserne was occupied as previously. Sentries observed wore red-bordered black epaulets with artillery insignia. Elements of the unit were continually rotated to the Bohnenland training area, repeatedly remaining there for several days and nights. Between 26 May and 2 June, two types of howitzers were observed in the installation. On 4 June, 15 prime movers towing 6 gun barrel trailers, 6 gun mount carriages and 6 trailers, each occupied by 20 soldiers, were seen entering the installation, escorted by jeep occupied by 2 officers, and sedan occupied by 2 officers. At 3:45 a.m. and 2:30 p.m. on 5 June, an undetermined number of two-load guns left the installation toward Bohnenland. In the morning of 3 June, about 80 troops with signal equipment left the installation for an exercise and returned at about 5:30 p.m. About 80 troops received individual training and training in firing in the barracks yard. On 10 June, driving school trucks each occupied by 10 soldiers, left the installation. They returned at about 3:30 p.m. At about 9:45 a.m., 6 prime movers towing 2 gun mount carriages, 2 gun barrel trailers and trailers left the installation

Comment. The information indicates no change in the occupation of the barracks installations mentioned prior to early June over the preceding report [redacted] in late May. [redacted] Source of paragraph 1 already previously mentioned a second two-load gun type in the Generalfeldzeugmeister Kaserne, in addition to the 203-mm howitzers. According to T/E, the 124th Hv How Arty Brig (US) has been believed equipped only with the latter type of gun. According to the information in this report, the unidentified two-load guns could only be 280-mm howitzers, the presence of which in Brandenburg cannot be confirmed by the vague indications available.
